Sole Distributors to the
Jobbing and Wholesale Trade for the

Durham Hosiery Mills

Over 2000 Brands of Hosiery Alone

This indicates how necessary the

Directory of Textile Merchandise

(Formerly "Directory of Textile Brands and Trademarks")

is to the Buyer of textiles. Every Buyer should have a copy of the *Directory of Textile Merchandise* at his elbow. With nothing else but the *Brand* name he can quickly find who makes, or the nearest distributor of the product he is seeking. *Lists over 15,000 different Brand Names*—hosiery, underwear, sheetings, garters, denims—all kinds of textiles.

If you are a Manufacturer of Textiles, the thousands of different branded textiles on the market is a warning of the care you must exercise in choosing names for your own products—to avoid duplication of names and perhaps law-suits and damages, resulting from infringement of another manufacturer's mark. Every manufacturer should consult the *Directory of Textile Merchandise* before attempting to place a new brand on the market.

Descriptive Circular on Request—or, Directory on approval.—Price, \$5.

FRANKLIN DYEING MACHINES

Franklin Dyeing Machines are made in three types as follows:—

Package Dyeing Machines which dye cotton, worsted, and woolen yarns in the wound form.

Jacks pool Dyeing Machines which dye worsted or woolen yarns on dresser spools.

Top Dyeing Machines which dye worsted tops on Franklin tubes.

IN PRACTICALLY every case where we have installed a Franklin Machine, the savings in winding costs and the reduction in yarn waste alone have paid for the installation in less than a year's time. Franklin Machines also save anywhere from a negligible amount to 85% of your coal, water, chemicals, floor space and labor, the amount of the saving depending on the kind of work and local conditions.

Given conditions under which we recommend their installation, Franklin Machines would be a good investment if they cost several times what they actually do.

We shall be glad upon request to substantiate our claims by actual figures and concrete examples.

JOB DYEING BY THE FRANKLIN PROCESS

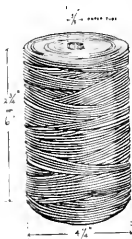

6" Cone for knitting trade. Weight of yarn from 16 to 20 oz.

3" Franklin Package. Weight of yarn from 8 to 12 oz.

6" Franklin Package. Weight of yarn from 12 to 24 oz.

Universal Wound Paper Tube.

WE OPERATE job dyeing plants in Providence, Philadelphia, Greenville, S. C., and Manchester, England.

All yarn, either cotton, worsted or woolen, is dyed in wound form thus eliminating skeins and warps and the resultant waste. We accept yarn on cones, tubes or bobbins and deliver back to you in the forms illustrated herewith.

Franklin packages are parallel tubes and will deliver yarn by rotating in a creel, or the yarn can be taken off over end. We can furnish wooden mandrels which, when inserted in the packages, allow them to be used in a standard creel. We can also furnish rewinding cups to facilitate delivery when the yarn is taken off over end.

Yarns dyed by the Franklin Process — in wound form under pressure — are exceptionally well penetrated which partly accounts for their unusual brilliance and solidity. Franklin colors are also guaranteed to be fast. The exceptional results on much of our work, particularly on single worsted yarns, cannot be duplicated by any other process.

The Franklin Process when used in the manufacture of colored shirtings, voiles or dress goods eliminates the necessity of beaming machines. This fact enables white goods manufacturers to undertake the manufacture of colored goods without putting in new equipment. We deliver yarn to them on tubes all ready for the V creel.

Our color card and prices will be forwarded on request. In order to obtain most prompt service write, wire or telephone our nearest plant.

WE ARE ALSO YARN MERCHANTS

Our yarn department can furnish you every facility for purchasing your grey yarn requirements through us if you so desire.

ALPHABETICAL INDEX

TO

The Textile Establishments

OF THE UNITED STATES AND CANADA

Textile Establishments of Mexico are not included in this list. See Pages 609-612 inclusive

*Indicates new establishments.

†Indicates change in name or old establishment taken over by another concern.

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters, thus:

A means asbestos mill.	J means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling.	K means knitting mill.	Pr means print works.
Bl means bleachery.	L means linen mill.	S means silk mill.
C means cotton mill.	M means mercerizing.	W means woolen mill.
D means dyeing establishment.	Misc means mills making braids; insulated wire; shoe and corset laces; embroideries; tinsels; fringes; trimmings, etc.	X means mills making felts (all kinds); mattresses; wadding; absorbent cotton; battings, waste, etc.
F means finishing works.		
Fl means flax mill.		
G for grass fibre plants.		

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names: viz.: proprietor's or company's name and also the name of the mill, as for example, Wm. F. Reed & Sons Co., Victoria Mill, Philadelphia, Pa. In the alphabetical index this is listed as follows: Wm. F. Reed & Sons Co., Philadelphia, Pa., also Victoria Mill (Wm. F. Reed & Sons Co.), the page number being given in both instances but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can be readily found through one or the other system of classification, viz.: by its name in the alphabetical index, or by its location in the body of the book where full particulars about each mill will be found.

Too Late for Classification List will be found on page 153.

HUMIDIFIERS

SARCO Temperature Regulator

prevents the size mixture from "skinning over," due to low temperature, or being forced out of box by excessive steam.

SARCO eliminates fluctuating temperatures, therefore there is no "creeping" of the slasher roll coverings, or "picking up" on the drying cylinders.

SARCO is self-operating. No auxiliary apparatus is required for perfect control. And the cost of installation is small.

If the **SARCO** Regulator doesn't simplify the work of the overseer and his slasher-tenders on **your** equipment under **your** conditions of operation, simply return it after a 30-day free-trial period. There is no obligation on your part.

SILK throwsters, weavers, knitters and hosiery manufacturers use PHILADELPHIA SILK OIL because it is the only oil that is absolutely uniform at all times and has been for fifteen years.

We have made only this one oil and one grade of it for the treatment of silk for many years, and every drum will give the same results if used in the same way each and every time.

Each and every drum is tested before it leaves our plant and must come up to our specifications or it is rejected, and a complete record of each drum is taken.

We will ship you a sample drum strictly on approval f. o. b. cars your station.

HYDROSULPHITES

MADE FROM

SULPHUR DIOXIDE

You can make pure concentrated solutions of Soda, Zinc or Lime Hydrosulphites much cheaper than you can buy dry Hydrosulphite powder. If you use Hydrosulphite let us make you a proposition.

SULPHUR DIOXIDE

as an Antichlor has many advantages.

3 2922 00392 356 9

—34 years is a good long time for drying cylinders to be in service

We are sure that as we found Butterworth machinery which has been in constant use for a comparatively great number of years, we would tell you of them.

At that time we were speaking of a calender that had been in use daily since 1859.

Well, a few weeks ago one of our representatives calling at a finishing plant was taken out in the works by the owner who, in an accusing voice, said, "When I bought that range of drying cylinders over there you folks told us that they would last ten years—fact is you guaranteed them for that long."

"I hope that ——" began our representative.

"Hope nothing, those cylinders have been in use every day for thirty-four years and they are good yet. Why don't you tell the truth about your goods?"

Need we add that these are the kind of "complaints" that we like to hear whether they are about dryers, calenders, tenters, or any other Butterworth product?

We have folders or literature of some sort on most all these products. We'll send it at once when we receive your request and we also offer the services of the Butterworth Organization in your individual finishing problems.
